- PVC Forex Sheet With Medium and High Density (for Printing, Kitchen Cabinet, Carpenters and Interior Decoration)
- Advertising Display
- Digital Printing Media
- WPC Panel

OUR VISION

Our Vision is to bring the most preferred and successful company of providing inspired solutions for signages and architectural solutions to architects in GCC area.

OUR VALUES

With uncompromising integrity as our foundation we will ensure our full trust by providing high quality products with very good price and on time delivery.

OUR MISSION

Perfect International General Trading (FZE), involved in trading and supply of premium quality products, and innovative and value added solution for sign makers, advertising (indoor & outdoor) and for architectural industries

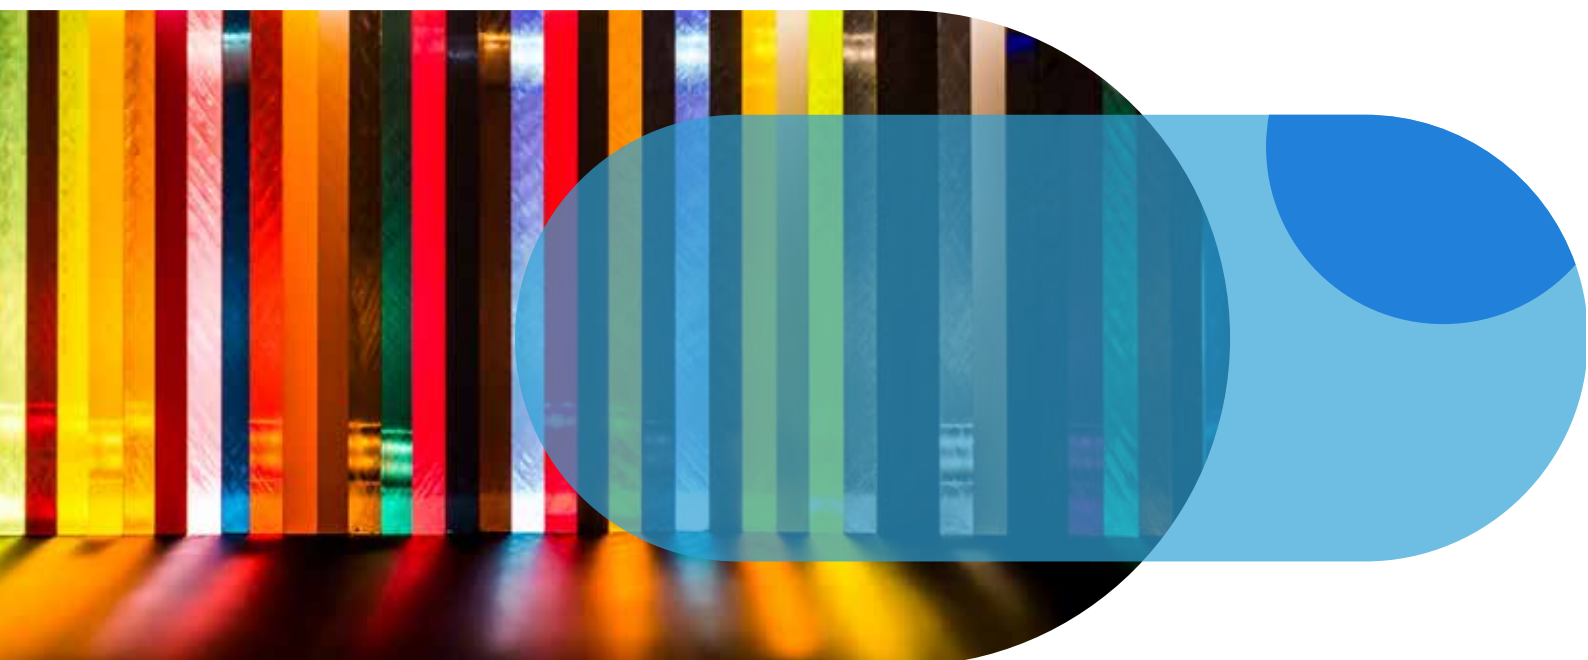

OUR STANDARDS

We will use our trusted brands and human talent to their best advantages. This care for people and trusted supplier is reflective of our standards. MPPT prides itself on its integrity, and we set ourselves the highest standards in relation to business practices. We will not compromise these standards

About Company

At Perfect International General Trading (Fze), we take pride in being your trusted partner in meeting all your advertising, signage, exhibition, architectural, interior and exterior design, construction, greenhouse, and event management needs. Established with a commitment to excellence, we have become a reliable supplier renowned for our quality products and exceptional service.

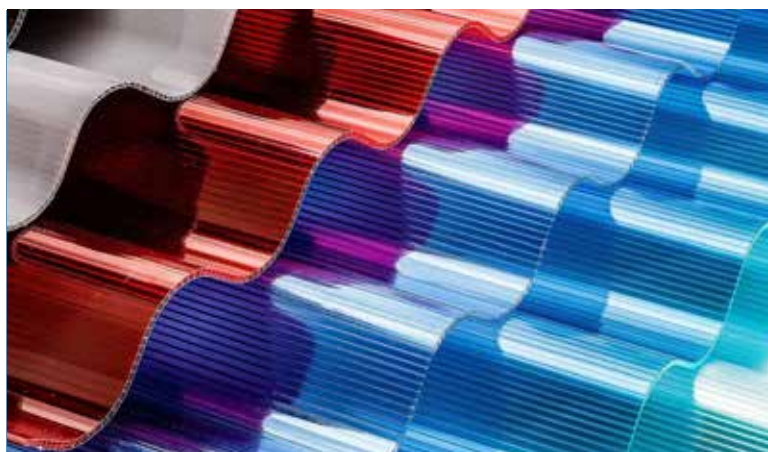

At Perfect International General Trading (FZE), our overarching goal is to consistently exceed the expectations of our customers by offering world-class products and innovative solutions tailored to their needs. We strive to maintain excellence in every aspect of our operations, from sourcing premium quality materials to delivering exceptional service. Our aim is to foster long-term relationships built on trust, reliability, and mutual success, while also promoting sustainability and making a positive impact in the communities we serve. With a commitment to continuous improvement and growth, we are dedicated to achieving excellence in all that we do and becoming a trusted partner for businesses across various industries.

SOLID PLAIN, PATTERN & MULTIWALL POLYCARBONATE SHEET & SYSTEM WITH ACCESSORIES

REVERSE MULTIWALL POLYCARBONATE SYSTEM

Multiwall polycarbonate sheet is a versatile and durable insulating glazing material crafted from robust polycarbonate. Renowned for its lightweight properties and exceptional damage resistance, polycarbonate sheeting offers superior strength and insulation capabilities.

SOLAR CONTROL

Solar control multiwall polycarbonate sheet with heat-reflecting technology offers an innovative solution to create naturally cool and well-lit interiors without the typical heat buildup associated with extensive glazing.

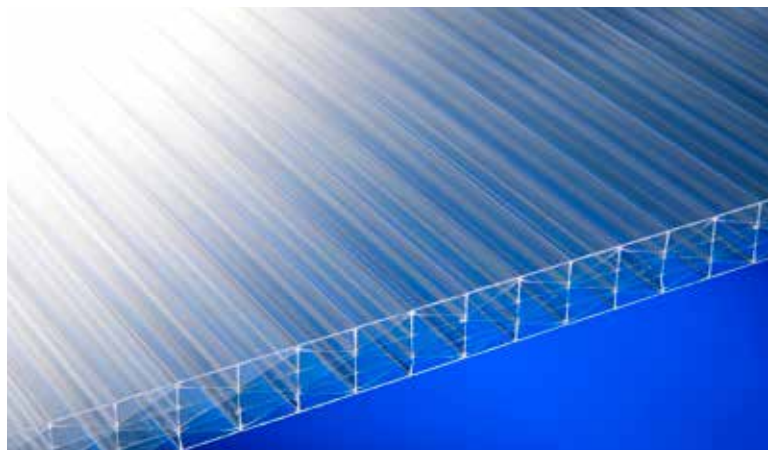

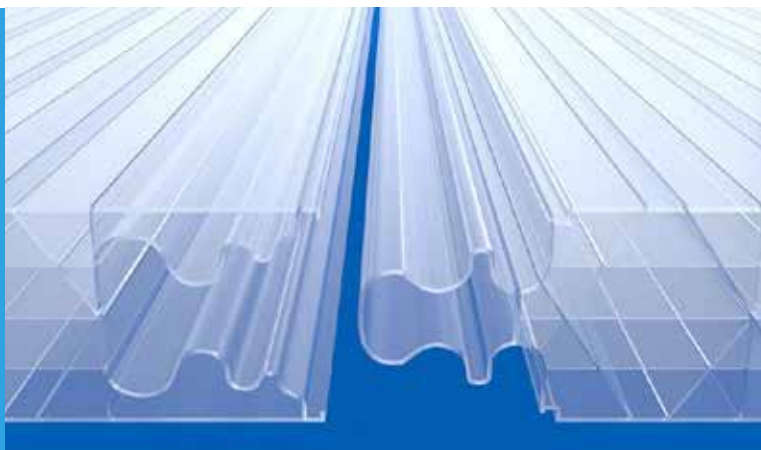

DUAL TINTS

Dual-tinted multiwall polycarbonate sheets present a cutting-edge solution, featuring dual-layer color combinations within the same sheet. This innovative design serves to mitigate heat buildup and minimize solar glare while still allowing soft, diffused natural daylight to permeate through.

MULTIWALL CLICK SYSTEM

Not only does the Click System simplify the installation process, but it also ensures a secure and stable attachment, enhancing structural integrity and durability. Moreover, its quick assembly allows for significant time savings, making it an ideal choice for projects with tight deadlines or limited manpower. We Supply Full Metal Accessories

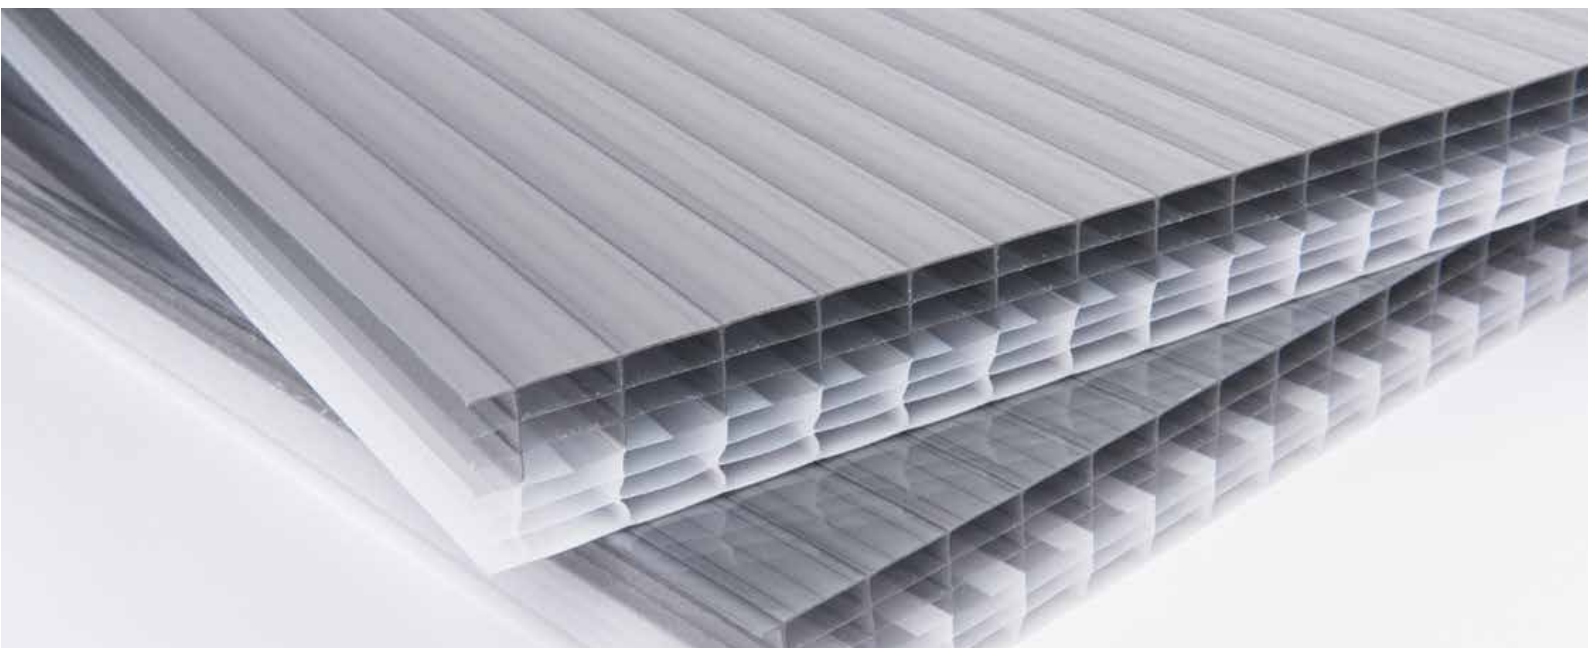

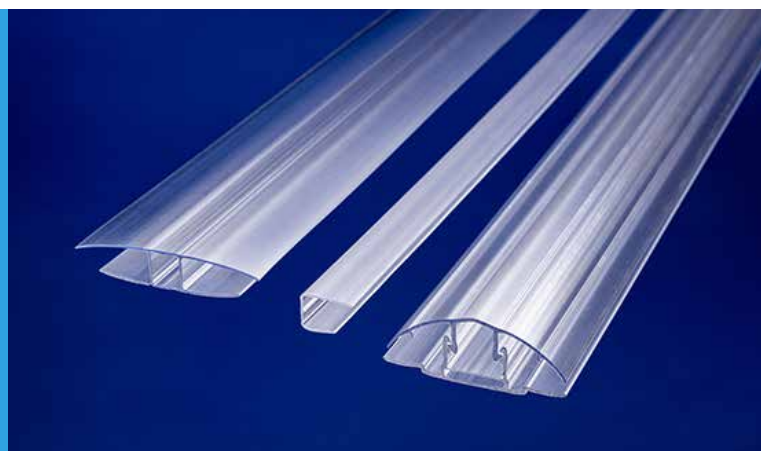

STANDARD MULTIWALL

Standard multiwall polycarbonate sheets are a versatile and widely-used building material known for their durability, transparency, and insulation properties. Composed of multiple layers of polycarbonate separated by air pockets, these sheets offer excellent thermal insulation while still allowing natural light to pass through.

POLYCARBONATE H & U CHANNEL

The use of H and U channels is integral to the successful installation of multiwall polycarbonate sheets, providing structural stability, weatherproofing, and a polished finish.

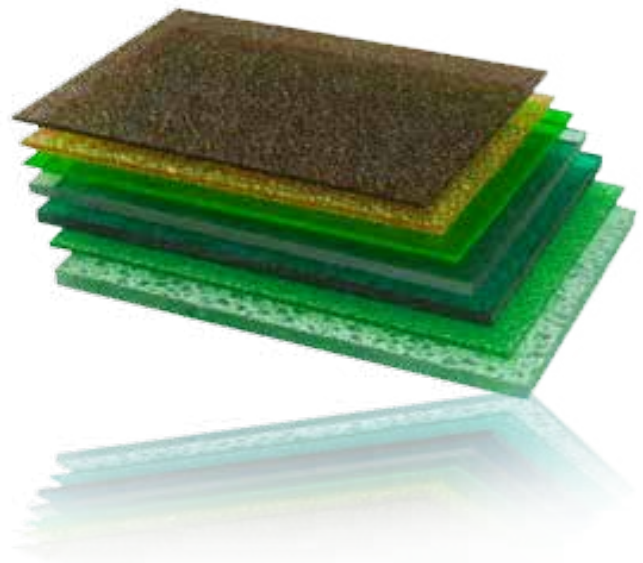

SOLID POLYCARBONATE SHEETS & ROLLS

Ideal solution in the field of applications where impact resistance & excellent light transmission are primarily required. The products available in flat & patterns such as textured, Crystal, and Prismatic shape, this is also available in sheet and roll.

Characteristics of Solid Polycarbonate sheets

- 250 times stronger than glass
- Light weight
- Cold formable and design freedom
- Good fire behaviour
- UV quoted – no UV radiation inside the glazing.
- Design freedom.

<i>Product Range</i>	<i>Thickness</i>	<i>Dimensions(sheets)</i>	<i>Dimensions(rolls)</i>
Clear, Opal, Opaque, Bronze and Wide Range of Colours Type of Sheets : Textured, Flat, Crystal and Prismatic	1 mm to 12 mm	1220 x 2440 mm 2000 x 3000 mm	Width: 2m, 2.05m, 2.1m Length: 15m, 30m Thickness: 1.6 to 3mm

*Custom made sizes ar possible against special order

Applications

- Building cladding and facades
- Residential glazing and conservatories
- Architectural interior
- Swimming pools
- Skylight and domes
- Outdoor signage

MULTIWALL POLYCARBONATE SHEETS / SYSTEMS

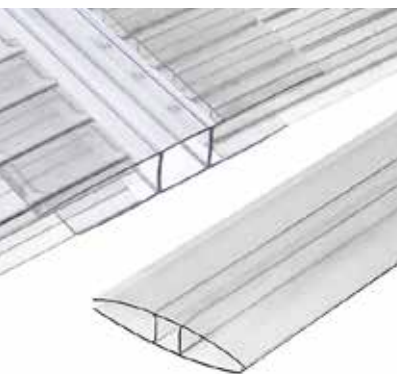

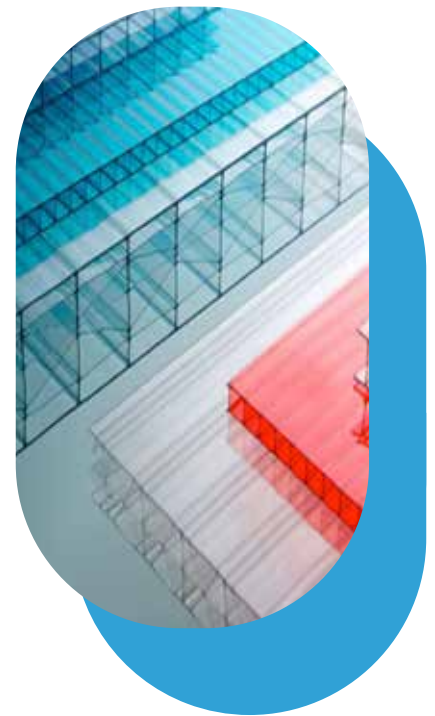

Multiwall polycarbonate sheets and systems are engineered to meet the stringent performance requirements of diverse clients and architects. Available in thicknesses ranging from 4mm to 60mm, with a wide variety of structures, these products cater to a myriad of applications. Whether it's sunrooms, skylights, barrel vaults, partitions, pergolas, industrial buildings, urban designs, or greenhouses, multiwall polycarbonate sheets excel in environments where safety and security are paramount.

<i>Size</i>	<i>Thickness</i>
<i>2100mm x 11800mm</i>	<i>4mm to 60mm</i>
<i>2100mm x 5800mm</i>	<i>4mm to 60mm</i>

Custom Size Possible

Features

- Very Light weight & Strong
- High impact resistant
- Good fire Performance
- UV Protection
- Design freedom.
- Excellent Thermal insulations
- Easy to use & simple assembly systems

Note: H&U profiles available for installation in green houses

PVC FOAM BOARD

- PVC free foam sheets & foam boards are rigid and light weight product with extrusion process with incompatible physical
- properties to meet wide range of advertising applications. The product can be used in both interior and exterior applications.
- Its surface is the perfect substrates for laminating, painting, screen painting, Vinyl lettering, advertising signs and display
- stands. Both are light weight and flexible makes great choice of sign makers.

Foam Board

Thickness

1220mm x 2400mm

1mm to 20mm

2030mm x 3050mm

1mm to 3mm

PAPPER FOAM BOARD

Papper foam board is a lightweight yet durable material with a foam core sandwiched between two layers of paper or cardstock. Its versatility makes it ideal for a multitude of applications, from arts and crafts to signage and presentations. Despite its light weight, paper foam board offers stability and rigidity, making it easy to handle and transport for projects of all sizes. Its smooth surface allows for easy printing of graphics or text and provides a suitable base for mounting artwork or photographs. Cost-effective and environmentally friendly options are available, making paper foam board a practical choice for both professional and DIY projects.

Foam Board

Thickness

1220mm x 2400mm

5mm to 10mm

CAST ACRYLIC SHEET

Cast acrylic sheets are renowned for their exceptional clarity, durability, and versatility across a multitude of applications. Through a meticulous casting process, these sheets maintain uniform thickness and a smooth, glossy surface finish, ensuring optimal optical properties. With outstanding impact resistance and weather durability, they prove ideal for both indoor and outdoor use, from signage and architectural glazing to display cases and lighting fixtures. Their ability to withstand machining and fabrication processes allows for easy customization to meet specific design requirements. Available in various colors, tints, and thicknesses, cast acrylic sheets offer a wide range of options for creative expression and functional solutions in diverse industries and projects.

Applications

Advertising and signage applications
Interior fit out
Point of display
Skylight, barrel vaults & Domes etc.
Kitchen cabinets
Exhibition stands
Furniture Manufacturing
Lighting and visual communications

Features

Easily thermoformable
Optical quality – up to 93% light transmission
Highly weatherable
Excellent temperature resistant
Excellent Chemical resistant

MIRROR ACRYLIC SHEET

Mirror acrylic sheets provide a lightweight and versatile alternative to traditional glass mirrors. Featuring a reflective surface akin to glass, these sheets offer clear and distortion-free reflections, making them suitable for various applications such as bathrooms, gyms, retail displays, and decorative purposes. Their lightweight nature facilitates easier handling and installation, reducing the risk of breakage during transportation and use. Moreover, mirror acrylic sheets boast superior durability and impact resistance compared to glass, ensuring safety in public spaces and areas where breakage may pose a risk. Resistant to moisture, UV radiation, and harsh weather conditions, these sheets maintain their reflective properties both indoors and outdoors. With the ability to be easily cut, drilled, and fabricated, mirror acrylic sheets offer versatility in design and customization, catering to diverse project requirements. Available in a range of colors, thicknesses, and sizes, they provide ample opportunities for creative expression and functional solutions in various settings.

Acrylic Tubes & Rods

CLEAR EXTRUDED ACRYLIC ROD

Clear extruded acrylic rod is a versatile lightweight material with high impact strength. Available in a wide range of diameters it can be easily worked for use in many applications.

BLACK/WHITE EXTRUDED ACRYLIC ROD

Clear extruded acrylic rod is a versatile lightweight material with high impact strength. Available in a wide range of diameters it can be easily worked for use in many applications.

COLOURED EXTRUDED ACRYLIC ROD

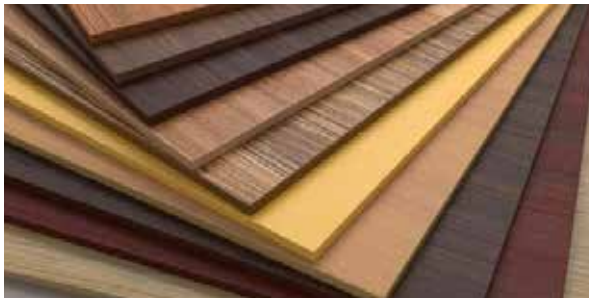

Premium extruded acrylic rod is available in a range of vivid colour options. Acrylic rod is a strong versatile material suitable for use in multiple applications.

COLOURED TRANSPARENT EXTRUDED ACRYLIC ROD

Solid acrylic rod available in a range of transparent colours. Our acrylic rod is available in a variety of diameters and can be cut to your required length.

Aluminum Composite Panel

WOODEN GRAIN ACP ACM

The natural look of wood without the weight, maintenance difficulty, or expense. That's what our range of wood finishes is all about. These Wooden Grain ACP ACMs present the rich beauty of mahogany, walnut, maple, zebrawood, teak, and oriental rattan in Aluminum Composite Panels

PE COATING ALUMINUM COMPOSITE PANEL

The Aluminum Composite Panel, commonly known as ACP, is a flat product consisting of two thin roll-coated aluminum sheets with a non-aluminum core. The core is made of polyethylene or a mixture of polyethylene and refractory mineral fillers.

ALUMINUM COMPOSITE MATERIAL

Aluminum composite material (ACM) is a rigid panel made from two sheets of pre-machined aluminum bonded to a polyethylene core. ACM sheets are lightweight without sacrificing durability and are commonly used for outdoor signage and channel letter backing.

ALUMINUM COMPOSITE PANEL

Aluminum composite panels range in thickness from 3mm to over 6mm; they are made of aluminum with polyurethane in the middle. Aluminum composite panels are usually coated with resin or polyester; due to their durability, they can be used as wall cladding.

DIGITAL PRINTING MEDIA
